## Blowing Sponge

FCST-BS Blowing Sponge are used when cleaning dust or moisture from a microduct. The sponge is simply blown through the microduct by the air pressure from the installation tool. The sponges are also used to smear out cable blowing lubricant in microduct.

- Quick and easy cleaning operation.
- Density 10-100kg/m<sup>3</sup> can be customized.
- Diameter 4-1000mm can be customized.
- Ensures clean ducts for best blowing performance.
- High-quality PU sponge material, strict quality control, passed environmental testing and certification.

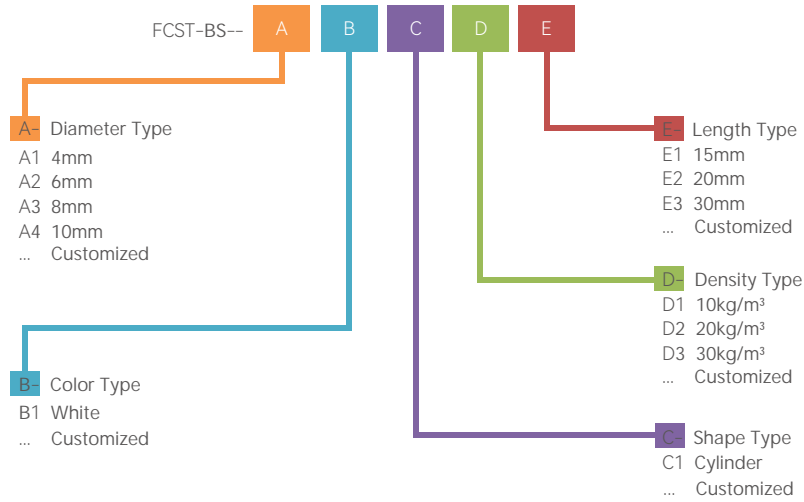

### Product Specifications

Construction	Description
Material	PU Sponge
Diameter	4-1000mm,customized
Density	10-100kg/m <sup>3</sup> ,customized
Length	15/20/25mm,customized
Color	White,customized
Shape	Cylinder,customized

**Ordering Information**

\*Note: The specified model is determined based on optional configurations. For example: FCST-BS--A1-B1-C1-D1-E1.

**Related Products**

Telecom Manhole Chamber

Microduct Connector

Divisible Duct Sealing

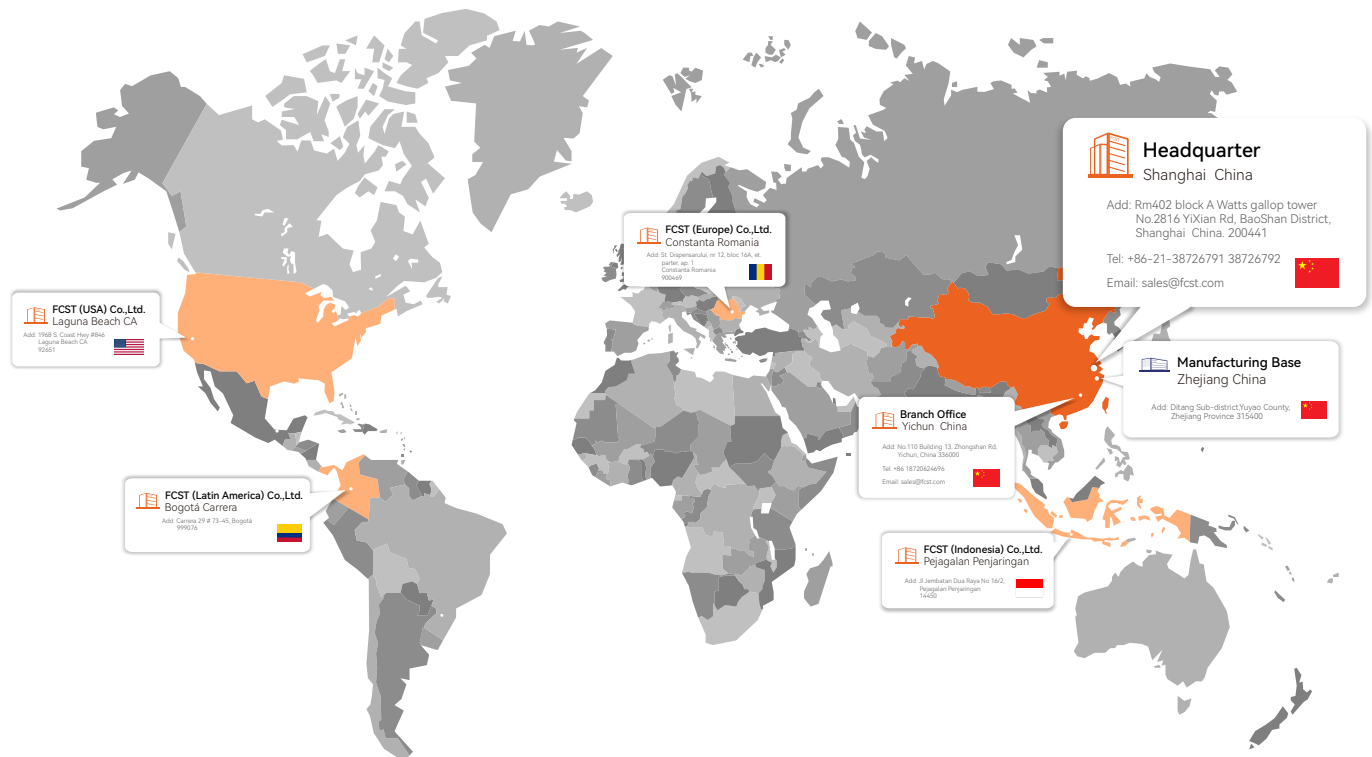

Marker Ball

## FCST - Better FTTx, Better Life.

At FCST, we manufacture top-quality microduct connectors, microduct closure, telecom manhole chambers and fiber splice boxes since 2003. Our products boast superior resistance to failure, corrosion, and deposits, and are designed for high performance in extreme temperatures. We prioritize sustainability with mechanical couplers and long-lasting durability.

FCST aspires to a more connected world, believing everyone deserves access to high-speed broadband. We're dedicated to expanding globally, evolving our products, and tackling modern challenges with innovative solutions. As technology advances and connects billions more devices, FCST helps developing regions leapfrog outdated technologies with sustainable solutions, evolving from a small company to a global leader in future fiber cable needs.
